

# OUR CAPABILITIES

## INJECTION MOULDING

Our production facility has 18 moulding machines and we can manufacture anything from a fraction of a gram to 650 grams. A variety of second operations such as pad printing, ultrasonic welding and laser etching are available, offering our customers a one stop solution.

## QUALITY CONTROL

A closely observed preventative maintenance programme across our range of machines ensures high levels of quality and reliability.

## BSI ACCREDITED

We have been BSI Accredited since 2000. All our systems are accredited to BSI Standards ISO9001:2008 and Medical ISO 13485:2003.

## PRECISION TOOL MAKING

We have expertise in the design and manufacture of plastic injection mould tools, which enables us to take your concept to full manufacture and distribution.

## COMPONENTS FROM STOCK

We can be an extension of your warehouse and hold stock ready for immediate delivery.

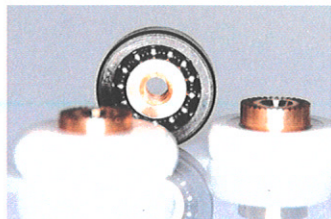

## SMALL & LARGE PRODUCTION RUNS

We work to client demands, producing small & large batch runs to meet customer needs.

We welcome audits from any of our customers both current and potential and will do all we can to ensure we achieve your quality requirements.

— WE OFFER INHOUSE DESIGN AND BUILD OF PROTOTYPES — STOCKHOLDING AVAILABLE FOR HIGH VOLUME ORDERS —

## >> Our Core Industries

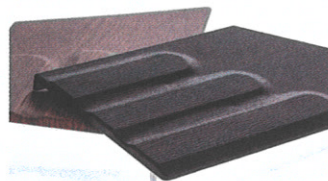

### >> CRITICAL BEARINGS

We have over 20 years of experience in the design, development and manufacture of thermoplastic corrosion-resistant bearings & assemblies.

### >> MEDICAL PRODUCTS

S&S Plastics are committed to supplying high quality, fault free medical device components fully supported by the ISO Accreditation ISO 13845:2003

### >> WINDOW & BUILDING

S&S Plastics has grown extensively through our increasing supplies of building products and glazing components to the replacement window industry.

### >> ELECTRONICS

RoHs and Reach compliant high quality polymer Plastic Electronic Housing and Enclosures from design through to manufacture of the product.

## >> Case Study

Our expertise in production methods and supply chain procedures recently allowed us to come to the aid of a building product manufacture whose regular supplier had let them down. We investigated the catalogue of over 50 components and successfully project managed each one from introduction of tooling and through to main-stream production, finalising the programme within 12 weeks.

## >> Testimonials

*"S&S Plastics fulfilled all required criteria and continue to improve their processes where necessary to the benefit of their customers. Over the past two years S&S have achieved a top 5 Supplier Status with us and I look forward to working with and building on the relationship for many years to come."*

*-MICK MC ALINDON - SCM MANAGER*

*"We have worked with Richard and his team at S&S Plastics for many years and they continue to perform to a high standard. The attention to detail for tool design is extremely high and the advice the team offer is clearly from people with great experience. The parts supplied are of a very high quality."*

## PLASTIC INJECTION MOULDING & PRECISION TOOLMAKING

### >> Who are S&S Plastics?

A leading East Midlands plastics manufacturer with over 25 years' experience in plastic injection moulding. We manage our customers' projects from inception, through the design, prototyping, and development stages and into mainstream production. Dedicated to constantly improving quality, we employ a workforce with the skill to handle any materials and the passion to deliver outstanding customer service above and beyond industry standards. We pride ourselves on our ability to accommodate any requirements and act as a single source supplier for your plastic manufacturing needs.

### >> What We Do

#### Injection moulding

Our production facility has 18 best performing injection moulding machines ranging from 6T to 200T.

#### Tool design and manufacture

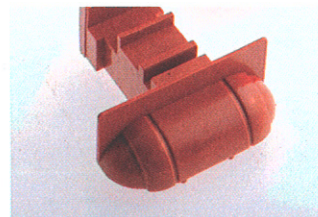

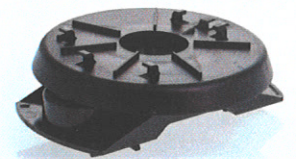

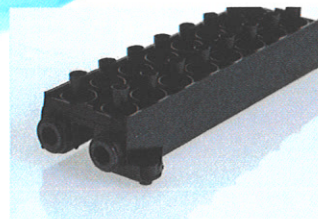

Our team can develop tools from scratch through SolidWorks and work directly with existing CAD data.

#### Secondary Operations

Our capabilities of second operations have developed from working with our customers and supporting their full requirements.

#### Quality Services

All our systems are accredited to BSI Standards ISO9001:2008 and Medical ISO 13485:2003. Our quality team uses the latest technology and techniques to offer our customers the inspection reports they require.
